

- Q.24 Write short note on function point metric.
- Q.25 What is software development life cycle (SDLC)?
- Q.26 Explain in brief the working of prototype model.
- Q.27 What are various types of maintenance?
- Q.28 Name some basic components of SRS.
- Q.29 Write a note on cocomo model.
- Q.30 Mention any five difference between Software Verification and Validation.
- Q.31 Differentiate between black box testing and white box testing.
- Q.32 Explain various features and advantages of SRS.
- Q.33 Explain unit testing and integration testing.
- Q.34 Explain LOC? What are the advantages and disadvantages of using LOC as Key Measure?
- Q.35 Explain the advantages and disadvantages of prototype model.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain waterfall model in detail with its limitation and benefits.
- Q.37 What do you understand by white box testing? Explain various types of white box testing technique in detail.
- Q.38 What do mean by software metrics? Explain its various categories.

No. of Printed Pages : 4
Roll No.

5th Semester/ Comp, IT Subject : Software Engineering

Time : 3 Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Which of the following is language processor?
a) Assembler b) Interpreter
c) Compiler d) All of the above
- Q.2 Spiral model originally proposed by _____.
a) Boehm b) Winston
c) Royce d) Dexter
- Q.3 Which type of approach is used in function oriented approach of software design?
a) Top down b) Bottom up
c) Both d) None
- Q.4 SRS stands for:
a) Software Requirement specification
b) Software Required Software
c) Software Rate Specification
d) None of the above

- Q.5 Which of the following is an example of high level programming language?
- a) Python b) Window XP
c) Linux d) Norton
- Q.6 What is a software?
- a) Software is set of programs
b) Software is documentation and configuration of data
c) Software is set of programs, documentation & configuration of data
d) None of the mentioned
- Q.7 White Box testing is done_____.
- a) With internal knowledge of product
b) Without internal knowledge of product
- Q.8 What is a prototype?
- a) Mini-model of existing system
b) Mini-model of the proposed system
c) Working model of the existing system
d) None of these above
- Q.9 _____ is a software development activity that is not a part of software processes.
- a) Validation b) Specification
c) Development d) Dependence
- Q.10 In which language compiler translates the program written in High Level language?
- a) Machine language b) Low level Language
c) Assembly language d) None

(2) 180855/170855/
120855/030855

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (10x1=10)

- Q.11 Full form of LOC is _____.
- Q.12 Software design of a project act as _____ between problem domain and solution domain. (bridge/gap)
- Q.13 Requirement engineering is the process of understanding the customers_____.
- Q.14 COCOMO stands for _____.
- Q.15 Systems are created to solve _____. (Problem / Software)
- Q.16 SRS serves as a contract between customer and developer. (True/False)
- Q.17 Name one type of Testing.
- Q.18 Internal details of product are required in _____ Box testing. (White / Black)
- Q.19 Loosely coupled module means that the module have _____ interdependency (Less / more)
- Q.20 Two types of system are _____ and _____.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Differentiate between the open system and closed system.
- Q.22 What are the main objectives of software engineering?
- Q.23 What is Requirement analysis?

(3) 180855/170855/
120855/030855
