

- Q.27 Why the neutral of the bank capacitor is grounded?
(CO6)
- Q.28 Explain the procedure of inspection, storage and handling of power transformers. (Co6)
- Q.29 What are the qualities of a good lighting arrestor?
(CO7)
- Q.30 Name the various instruments used for testing the installation. (CO8)
- Q.31 Why substations are installed near the load centers?
(CO6)
- Q.32 What is the main object of earthing? (CO7)
- Q.33 What are bird guards? Explain with the help of a diagram (CO2)
- Q.34 Explain patrolling and visual inspection of lines
(CO7)
- Q.35 Write rule 30 for service line & apparatus on consumer's premises. (CO1)

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 Explain various components of substations. (CO6)
- Q.37 What are the various methods of fault location in cables? (CO3)
- Q.38 Explain the steps for troubleshooting of electric motors. (CO8)

(1860) (4) 180943

No. of Printed Pages : 4 180943
Roll No.

4th Sem / Elect.

**Subject:- Installation and Maintenance of
Electrical Equipment**

Time : 3Hrs. M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Megger is used to measure (CO1)
a) Insulation resistance b) Earth resistance
c) Power d) Frequency
- Q.2 What is the use of current transformers? (CO4)
a) Stepping up AC current
b) Measuring and protection
c) Stepping down AC current
d) Both (b) and (c)
- Q.3 Cross arm are made of (CO3)
a) Iron rod b) Angle iron
c) Asbestos sheet d) All of above
- Q.4 Bird guards are used (CO4)
a) To overcome the fault caused by birds
b) To overcome excessive current caused by birds coming in contact
c) To overcome the lightning stroke
d) none of these

(1) 180943

- Q.5 What does PTW mean? (CO1)
 a) Permit to work b) Permission to work
 c) Both a & b d) None of these
- Q.6 The Sf6 circuit breakers are preferred for the substation with (CO3)
 a) 33kV b) 11kV
 c) 110kV d) 220kV
- Q.7 Seven 2 V cells are connected in parallel. The output voltage is (CO1)
 a) 1V b) 1.5 V
 c) 1.75 V d) 2V
- Q.8 Open circuit test on transformers is conducted so as to get _____ (CO4)
 a) Hysteresis loss b) copper losses
 c) Core losses d) Eddy current loss
- Q.9 The grid sub-stations are generally (CO4)
 a) Indoor substations
 b) Outdoor substations
 c) Pole mounted substations
 d) underground substations
- Q.10 The color of fresh dielectric oil used in transformer is (CO3)
 a) Dark brown b) Pale yellow
 c) Pale pink d) none of above

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 PT stands for _____. (CO6)
 Q.12 Buchholz relay is used in _____. (CO6)
 Q.13 Define tower. (CO1)
 Q.14 Define jumper. (CO6)
 Q.15 Hexa-saw is main _____ used for cutting. (CO1)
 Q.16 What is dead end? (CO3)
 Q.17 Explain permit to work? (CO9)
 Q.18 What is a bus bar? (CO6)
 Q.19 Buchholz relay is used in _____. (CO6)
 Q.20 Define tee-off point. (CO4)

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Write and explain Rule 88 for guarding. (CO1)
 Q.22 Write about the artificial respiration method for the electrocuted person.. (CO7)
 Q.23 Explain continuity test. (CO3)
 Q.24 Why a substation is called a Grid sub station? (CO6)
 Q.25 Explain about clearance, while (CO2)
 i) line crossing over and
 ii) communication line
 Q.26 Classify different types of maintenance. (CO9)
