

- Q.28 Explain speed time characteristics of traction.
- Q.29 Explain electric braking.
- Q.30 Compare belt and chain drive.
- Q.31 Explain vapour compression refrigeration cycle.
- Q.32 Write Short note on extraction and refining of metal.
- Q.33 Describe Kando system of electric traction.
- Q.34 What are the desirable properties of resistance heating element?
- Q.35 Write short note on ECO friendly refrigerants.

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 Describe construction, operation and application of electric arc furnace.
- Q.37 How do you select a motor for a particular job? Explain power transmission using belt and chain drive.
- Q.38 Explain speed time characteristic used in India railway traction services.

No. of Printed Pages : 4
Roll No.

5th Semester/ Elect Subject : Utilization of Electrical Energy

Time : 3 Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 MIG stands for _____.
a) Metal Induction gas b) Metal inert gas
c) Metal Index gas d) Metal insert gas
- Q.2 Textile ,mills uses _____ motor.
a) Three phase Induction motor
b) DC Series motors
c) DC Shunt Motor
d) Single Phase Induction motor
- Q.3 The system of traction employed for suburban railways is _____.
a) DC electric traction
b) AC electric traction
c) Steam traction
d) Diesel traction

- Q.4 Radiant heating is used for _____.
 a) Drying only b) Drying and baking
 c) Baking only d) None of the above
- Q.5 Projection welding is _____.
 a) Submerged Arc welding b) Gas Metal welding
 c) Resistance welding process d) None
- Q.6 The size of a domestic refrigerator is given in _____.
 a) Litres b) Kgs
 c) Tonnes d) None of the above
- Q.7 The electrodes used for projection welding are _____.
 a) Aluminium alloy
 b) Copper alloy Electrode
 c) All of the above d) None of the above
- Q.8 The lighting system of earlier coaches was _____.
 a) 220 v AC system b) 12 V DC system
 c) 11 Kv AC system d) 220 KV AC system
- Q.9 Electrode position is obtained on _____ electrode.
 a) Anode b) Cathode
 c) Both d) None
- Q.10 The suitable motor for electric traction with 25 kV, 50Hz AC supply is _____.
 a) Single phase series motor
 b) DC series motor
 c) DC shunt motor
 d) Universal motor

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (10x1=10)

- Q.11 Write the full form of TIG.
- Q.12 What is chain drive?
- Q.13 Current flow in electrolyte is due to _____.
- Q.14 Define electric heating.
- Q.15 The motor used in traction system is _____.
- Q.16 Name an eco-friendly refrigerant.
- Q.17 Seam welding is not used for _____.
- Q.18 Write one application of microwave heating.
- Q.19 Write the method used for heating in electric room convactor.
- Q.20 Define refrigeration.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 What are the applications of dielectric heating?
- Q.22 Explain the galvanizing process. State its disadvantages.
- Q.23 Explain braking. What is plugging?
- Q.24 Explain the role of flywheel in electric drive.
- Q.25 Differentiate TIG and MIG welding.
- Q.26 Describe various current collectors and pantograph.
- Q.27 What are the factors affecting schedule speed?
