

- Q.23 Justify the use of PCON register.
- Q.24 Explain the memory organization of 8051 microcontroller
- Q.25 Explain the Flags available in 8051 microcontroller.
- Q.26 Explain serial communication of 8051 microcontroller
- Q.27 Explain the TMOD register of 8051 microcontroller
- Q.28 Explain the function of EA pin in 8051
- Q.29 Explain the alternate role of port 3 of 8051 microcontroller
- Q.30 Explain any two assembly directives.
- Q.31 Explain two data transfer instructions of 8051
- Q.32 Briefly explain the interrupt system of 8051 microcontroller
- Q.33 Explain the interfacing of LCD with microcontroller
- Q.34 How is a compiler different from assembler.
- Q.35 List 5 advantages of PIC over 8051

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 Draw the diagram of Port 3 and explain its working.
- Q.37 Explain the interfacing of keyboards with 8051 microcontroller
- Q.38 With a neat sketch explain the internal block diagram of 8051 microcontroller

No. of Printed Pages : 4

181055/171055/125952

Roll No.

5th Sem / Eltx, Power Eltx

Subject:- Microcontrollers/ Microcontrollers & Applications

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 1Kilo Byte=_____
- a) 1000 Bytes b) 1024 Bytes
- c) 1000 bits d) 1024 Bits
- Q.2 Address of Bit addressable memory of 8051 is_____
- a) From 00H to 0FH b) From 10H to 1Fh
- c) From 20H to 2FH d) From 30H to 3Fh
- Q.3 Value of SP after reset in 8051 microcontroller is_____
- a) 00H b) 07H
- c) 7FH d) FFH
- Q.4 During PUSH operation in 8051 microcontroller SP is_____
- a) incremented by 1 b) incremented by 2
- c) decremented by 1 d) decremented by 2

- Q.5 What is the role of Port 3.7 of 8051 microcontroller
- a) Serial o/p port b) Serial i/p port
- c) Read d) Write
- Q.6 SFR used to configure 8051 as timer or counter is_____.
- a) TCON b) SCON
- c) PCON d) None of the above
- Q.7 PC register in 8051 is_____ bit wide.
- a) 1 bit b) 4 bit
- c) 8 bit d) 16 bit
- Q.8 Internal ROM available in 8031 is
- a) 4K Bytes b) 8K bytes
- c) 16K Bytes d) Zero bytes
- Q.9 Which among the following is bit addressable in 8051
- a) SBUF b) B
- c) TMOD d) SP
- Q.10 Vectored address associated with TFI is
- a) 0003 b) 000B
- c) 0013 d) 001B

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Full form of PC is_____
- Q.12 Full form of PCON is_____
- Q.13 The highest signed number that can be stored in 8 bit register is_____
- Q.14 Maximum memory size which can be interfaced with 8051 is_____ bytes.
- Q.15 Port 2 of 8051 is used as high order address bus. (True/False)
- Q.16 Result of multiplication is stored in both A and B register. (True/False)
- Q.17 The PSW register of 8051 contains zero flag. (True/False)
- Q.18 Full form of UART is_____
- Q.19 One Byte=_____ bits
- Q.20 8051 has_____ Ports.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 List five difference between microprocessor and microcontroller.
- Q.22 Explain the demultiplexing of address and data bus of 8051 microcontroller
