

- Q.29 Describe various food borne pathogens in detail.
- Q.30 Explain the microbiology of cereals and their preservation methods.
- Q.31 Define micro-organisms with their types.
- Q.32 Explain the general type of spoilage in fruits and vegetables.
- Q.33 Describe various chemical antimicrobial agents.
- Q.34 Explain the microbiology of meat.
- Q.35 Explain the undesirable role of microorganisms in food.

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 Explain the microbiology of milk in detail
 - Q.37 Explain the concept of “Thermal Death Time” in detail.
 - Q.38 What are the various factors affecting heat resistance of microorganisms?

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 In bread manufacturing, fermentation is carried out by-
 - a) Streptococcus thermophilus
 - b) Saccharomyces cerevisiae
 - c) S. Carlsbergensis
 - d) Lactobacillus bulgaricus
- Q.2 Process that completely destroys the micro-organisms.
 - a) Pasteurization
 - b) Sterilization
 - c) Disinfection
 - d) Asepsis
- Q.3 The microorganisms multiply and die in-
 - a) Geometric order
 - b) A-Logarithmic order
 - c) Logarithmic order
 - d) None of the above
- Q.4 Which of the following is a mold?
 - a) Saccharomyces
 - b) Staphylococcus
 - c) Bacillus
 - d) Rhizopus

- Q.5 What is the purpose of the dye reduction test (MBRT) in food microbiology?
- Measurement of microbial load
 - Detection of food colorants
 - Assessment of good texture
 - Identification of food borne pathogens
- Q.6 Which of the following are produced by microorganisms?
- Alcoholic beverages
 - Fermented dairy products
 - Breads
 - All of the above
- Q.7 What is the safe level of moisture content in cereal flours?
- 18 percent
 - 15 percent
 - 13 percent
 - 14 percent
- Q.8 What is the full form of IMF?
- Inner Moisture Foods
 - Intermediate Moisture Foods.
 - Inconspicuous Moisture Foods.
 - Inane Moisture Foods
- Q.9 Watery soft rot is found mostly in-
- Fruits
 - Vegetables
 - Cereals
 - All of these
- Q.10 Which of the following is made with lactic acid bacteria?
- Wine
 - Bread
 - Cider
 - Sauerkraut

(2) 181131/121131/031131

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Define Putrifaction.
- Q.12 Define Chilling.
- Q.13 Define food irradiation
- Q.14 Define food fermentation
- Q.15 Expand MBRT.
- Q.16 Name the microorganism responsible food intoxication.
- Q.17 Enlist various physical antimicrobial agents.
- Q.18 Define Mesophiles.
- Q.19 Name any two food borne diseases.
- Q.20 Which bacterial is responsible for making curd?

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Define food microbiology with its importance.
- Q.22 Why antimicrobial agents are added to food?
- Q.23 Explain the microbiology of butter.
- Q.24 Briefly write about the history of food microbiology.
- Q.25 Explain the microbiology of fish.
- Q.26 What are the differences between sterilization and pasteurization?
- Q.27 Define spoilage. Enlist different food borne pathogens involved in spoilage of food?
- Q.28 Explain the growth curve in detail.
