

- Q.24 Explain primary, secondary and tertiary package with suitable examples.
- Q.25 Explain working of form, fill and seal machine.
- Q.26 Write the advantages and disadvantages of plastic as packaging material.
- Q.27 Explain Flex-vac and Heyseen process of vacuum packaging.
- Q.28 List some value basic properties of nylon as packaging material.
- Q.29 Explain tensile strength and its significance.
- Q.30 Briefly explain about chemical inertness, resistant to internal pressure and processing aid properties of glass as packaging material.
- Q.31 Briefly explain the packaging requirements for fruits.
- Q.32 Describe the procedure of bagging.
- Q.33 List value basic properties of good packaging material.
- Q.34 Briefly explain various functions of food packaging.
- Q.35 Explain rules and regulations related to food packaging.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Describe the bottling procedure in detail.
- Q.37 Describe in detail the packaging requirements for cereal grains and baked food products.
- Q.38 Describe in detail the packaging of milk & milk products.

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 SWMA stands for _____
- Standards of weights and measure act, 1976
 - Standards of weights and monitoring act, 1976
 - Standards of water and measure act, 1976
 - Standards of water and monitoring act, 1976
- Q.2 Vacuum packaging _____ development of rancidity.
- Accelerates
 - Neither retards nor accelerates
 - Retards
 - None of these
- Q.3 _____ containers are widely used for packing mineral water.
- PVC
 - PET
 - PP
 - PVA

Q.4 The only chemical that reacts with glass is _____

- a) HCl b) H_2SO_4
- c) HNO_3 d) Hydrofluoric acid

Q.5 _____ gas is used in MAP of potato wafers.

- a) CO_2 b) N_2
- c) O_2 d) CO

Q.6 Monomer for polypropylene is

- a) Silica b) Ethylene
- c) Propylene d) Styrene

Q.7 Packaging in which inert gas is used _____

- a) Vacuum packaging b) Gas packaging
- c) Shrink packaging d) None of these

Q.8 The density of HDPE film is _____

- a) 0.941-0.965gm/ml b) 0.910-0.925gm/ml
- c) 0.998-1.965gm/ml d) None of these

Q.9 Softwoods fibers are _____ than hardwoods fibers

- a) Shorter b) Longer
- c) Equal d) None of these

Q.10 Paper derives its name from the reedy plant _____

- a) Papyrus b) Papiros
- c) Pyparus d) Papyros

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

Q.11 Packaging materials which comes directly in contact with food material _____.

Q.12 Now a days, bread is usually packaged in _____

Q.13 Aluminum foil acts as good barrier for _____

Q.14 Plastics that are soften by heating and hardened by cooling is _____

Q.15 In FFS machine, FFS stands for _____

Q.16 The step in which the information about the product are provided is known as _____

Q.17 Fresh vegetables that requires complete ventilation during transport and storage are frequently packed in _____

Q.18 Filling sterile product into sterile container in sterile environment is called _____

Q.19 OTR stands for _____

Q.20 Non-veg foods are denoted by _____ colour circle or square on the packet label.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

Q.21 List some outstanding properties of metal as packaging material.

Q.22 Explain different types of paper.

Q.23 Explain aseptic packaging. Highlight its advantages and uses.
