

- Q.32 What is the use of lead screw in lathe Machine?
- Q.33 Explain the nomenclature of a drill with neat diagram.
- Q.34 What are the effects of heat producing during cutting of Metal by tool?
- Q.35 Describe the geometry of single point cutting tool.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Define lathe. What are its different types. Explain any two.
- Q.37 Define Elements of Broach tool and nomenclature with neat sketch.
- Q.38 Explain boring tools, boring bars and boring heads with neat sketch.

Subject:- Workshop Technology - II

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Which of the following is the materials of boring bit?
- a) High speed steel b) Carbide
c) Ceramic d) all of the above
- Q.2 The Table of a shaper is made of
- a) Mild steel b) graded cast iron
c) Cast steel d) None of above
- Q.3 The commonly used material for broach is
- a) High carbon steel b) Mild steel
c) High speed steel d) Ceramic
- Q.4 Jigs are used to hold work in
- a) Turning b) Milling
c) drilling d) Planning

(1) 181744/171744/121744
/031744

- Q.5 The rake angle of a broach varies from
 a) 0°-5° degree b) 5°-10° degree
 c) 12°-15° degree d) 16°-20° degree
- Q.6 The following is machined dry:
 a) Aluminium b) Cast Iron
 c) Titanium d) All of these
- Q.7 A bench vice has the following types of threads
 a) Buttress b) Acme
 c) Square d) Metric
- Q.8 A Shaper is specified by
 a) Length of stroke b) Max size of tool
 c) Size of table d) None of above
- Q.9 Jigs are not used in _____
 a) Milling b) Drilling
 c) Tapping d) Welding
- Q.10 Rake angle of a cutting Tool may be
 a) Zero b) Positive
 c) Negative d) All of the above

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 A good lubricant should have _____ acid value (High/low)

- Q.12 Define Jig.
- Q.13 Define taper turning.
- Q.14 What is function of Face plate?
- Q.15 Define Boaring.
- Q.16 Define Single point cutting tool.
- Q.17 Push broach is subjected to _____ load.
- Q.18 The use of fixture mainly reduces _____ Time.
- Q.19 Write the use of Collet?
- Q.20 Define cutting speed.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Differentiate between a jig & fixture.
- Q.22 Explain clamping devices.
- Q.23 Explain the function of lubricant.
- Q.24 Explain working Principle of Shaper.
- Q.25 List various cutting parameters.
- Q.26 Write properties of cutting tool materials.
- Q.27 Explain saddle type turret lathe.
- Q.28 Explain stub boring bar.
- Q.29 Explain the working of shaper machine.
- Q.30 Write the function of cutting fluid
- Q.31 Name various type of broach.
