

- Q.26 Write short note on process layout. (CO3)
 Q.27 What do you mean by vibration damping. (CO2)
 Q.28 Write the procedure for recalibration of height gauge and depth gauge. (CO3)
 Q.29 Write short note on planned maintenance. (CO5)
 Q.30 Write short note on machinability. (CO3)
 Q.31 What are the causes of failure of seals, packing and gaskets? (CO4)
 Q.32 Write procedure of changing lubricating oil. (CO4)
 Q.33 Write a short note on lubricant disposal. (CO4)
 Q.34 Write a short note on AGV. (CO5)
 Q.35 Explain jib crane. (CO5)

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Define plant layout. Write the advantages & principles of a good plant layout. (CO2)
 Q.37 What is preventive maintenance? State its objectives and advantages. (CO5)
 Q.38 Define material handling system. Explain principles of economic material handling.

6th Sem / Mech

Subject:- Plant Maintenance and Material Handling

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 The down time cost consists of (CO1)
 a) Loss of production
 b) Wages paid to the workers
 c) Reduction in sales
 d) All of the above
- Q.2 The following is not a classification of maintenance (CO1)
 a) Corrective maintenance
 b) Timely maintenance
 c) Scheduled maintenance
 d) Preventive maintenance
- Q.3 Scheduled maintenance is _____ between breakdown maintenance and the preventive maintenance. (CO5)
 a) Joint b) Compromise
 c) Bridge d) In
- Q.4 The _____ goes on increasing with the increase in degree of maintenance efforts. (CO1)

- a) Cost of down time
 - b) Cost of spares
 - c) Labour and Overhead cost
 - d) All of the above
- Q.5 Transportation cost mainly depends on which of the following factors? (CO1)
- a) Distance
 - b) Weight of merchandise
 - c) Time required for transportation
 - d) All of the above
- Q.6 Process layout is also known as ____ (CO3)
- a) Functional layout
 - b) Batch production layout
 - c) Straight line layout
 - d) Both (a) and (b)
- Q.7 Total productive maintenance aims at (CO5)
- a) Less idle time
 - b) Increase in productivity
 - c) Zero down time
 - d) None of the above
- Q.8 The relationship that results between the two mating parts before assembly is called as (CO2)
- a) tolerance b) allowance
 - c) limit d) fit
- Q.9 The following is used to transport materials with in industry. (CO2)
- a) Roller conveyor b) Belt conveyor
 - c) Chain conveyor d) All of the above

(2) 181761A/171761A
/032351

- Q.10 What is equal to the differences between two limits of size of the part? (CO3)
- a) Tolerance b) Low limit
 - c) High limit d) Design size

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 What information is provided by BT curve? (CO3)
- Q.12 Elaborate MTTR (CO3)
- Q.13 Define basic size (CO2)
- Q.14 Define transition fit. (CO2)
- Q.15 Which type of production is best suited for product layout? (CO5)
- Q.16 What is the principle of Unit load? (CO3)
- Q.17 Give example of running maintenance. (CO5)
- Q.18 Write the use of pallet. (CO5)
- Q.19 Give an example of solid lubricant. (CO4)
- Q.20 Define foundation. (CO5)

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Explain common instruments required for testing. (CO3)
- Q.22 Explain economic aspects of maintenance. (CO1)
- Q.23 Give objectives of man power planning. (CO5)
- Q.24 Define fit and explain its various types. (CO2)
- Q.25 Explain the need for planning a plant layout. (CO3)
