

- Q.27 Explain tests for checking electrical insulation resistance in plastic products.
- Q.28 What is refractive index? Explain its importance in plastic products.
- Q.29 Explain flammability of cellular plastics.
- Q.30 Briefly, Explain ignition test of plastics.
- Q.31 Discuss luminous transmittance test.
- Q.32 Discuss arc resistance test and its importance.
- Q.33 Explain volume and surface resistivity test for plastics.
- Q.34 Discuss Smoke density test and its importance.
- Q.35 Write a short note on dart impact test of fibers.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Write short note on:
- Current test methods.
 - Clarity and haze test
- Q.37 Discuss various tests performed on plastic PVC pipes.
- Q.38 Discuss :
- Resistance of plastics of biological systems
 - Oxygen index test

No. of Printed Pages : 4

Roll No.

5th Sem / Plastic Subject:- Plastic Testing - II

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 ASTM D 1435 is the test standard used for:
- Haze
 - Outdoor weathering test
 - Water absorption test
 - Gas permeability test
- Q.2 Which polymer material show high weathering resistance:
- PC
 - PMMA
 - PTFE
 - All of these
- Q.3 ASTM D1003 is the test standard used for _____
- Haze
 - Outdoor weathering test
 - Water absorption test
 - Gas permeability test
- Q.4 Which material shows wax like appearance?
- PE
 - PP
 - PTFE
 - All of them

- Q.5 _____ is a measure of the susceptibility of the material to surface contamination.
- a) Surface resistivity b) Conductivity
c) Induction d) Current
- Q.6 Instrument used for measuring the refractive index of plastics
- a) Spectrophotometer b) Multi-meter
c) Refractometer d) Calorimeter
- Q.7 ASTM D1693 is the test standard used for:
- a) ESCR
b) Outdoor weathering test
c) Water absorption test
d) Gas permeability test
- Q.8 The ability of materials to develop a characteristics behaviour under repeated loading known as _____
- a) Toughness b) Resilience
c) Hardness d) Fatigue
- Q.9 If we drop a piece of sample in water and it simply floats that it may be _____.
- a) PE b) UF
c) Nylon d) MF
- Q.10 MFI value indicated in _____.
- a) g/1min b) g/100min
c) g/10min d) None of these

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Polystyrene gives _____ sound when fall on ground.
- Q.12 Expand ASTM.
- Q.13 Give ASTM number for Arc resistance test.
- Q.14 MFI stands for _____.
- Q.15 Name four optical tests for plastics.
- Q.16 Name four tests performed on plastic pipes.
- Q.17 Expand ASTM
- Q.18 When polythylene burnt it will give _____ appearance of flame.
- Q.19 Name any one biodegradable plastic.
- Q.20 Name two tests required for testing of electrical cables.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Explain criteria used for evaluation of Bio-degradability of plastics.
- Q.22 Explain test for color measurement of plastics.
- Q.23 Explain text methods for determining Di-electric constant of plastics.
- Q.24 Explain anti static test of plastics.
- Q.25 Write short note on ESCR.
- Q.26 How will you check weathering properties of plastics?
