

- Q.26 List properties of Colour and Fabric used during the transfer printing.
- Q.27 Write down the process of white and coloured discharge style of printing.
- Q.28 List any 04 advantages of Roller printing.
- Q.29 Write a short note on non-conventional printing.
- Q.30 List any 04 objectives of after treatment processes.
- Q.31 Explain the coloured discharging on reactive ground.
- Q.32 Write a short note on sublimation transfer printing.
- Q.33 Discuss the process of Batik printing.
- Q.34 Differentiate between resist and discharge style of printing.
- Q.35 Mention 04 merits of roller printing.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain the working of Roller printing machine with the help of neat diagram.
- Q.37 Explain the working of Rotary printing machine.
- Q.38 Write a short Note on
- Drying
 - Steam Ageing

No. of Printed Pages : 4
Roll No.

182544/122544/032544/
032535/2544

4th Semester/ Text. Design Subject : Printing Technology/ Printing Tech.-II

Time : 3 Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 _____ is the process used during after treatment of printing goods.
- Curing
 - Scouring
 - Desizing
 - None of these
- Q.2 _____ is the example of Discharging agent
- Salt
 - Starch
 - Urea
 - Rogalite C
- Q.3 Fixation of reactive dye takes place in _____ pH.
- Alkaline
 - Neutral
 - Acidic
 - None of these
- Q.4 Printing paste is made viscous by adding _____.
- Hydros
 - Thickener
 - Urea
 - None of these

Q.5 The Ground colour should be _____ in coloured discharge.

- a) Strong b) Easily removable
- c) Resistable d) None of these

Q.6 _____ material is generally used for making block

- a) Plastic b) Cotton
- c) Wood d) None of these

Q.7 Alkaline and reducing conditions are required in printing with _____ dyes.

- a) Vat b) Direct
- c) Acid d) None of these

Q.8 _____ has affinity for Disperse dyes.

- a) Cotton b) Nylon
- c) Polyester d) None of these

Q.9 _____ agent is added to printing paste to reduce foam formation.

- a) Hygroscopic b) Exhausting
- c) Defoaming d) None of these

Q.10 _____ is/are called after treatments in printing process.

- a) Washing off b) Ageing
- c) Drying d) All of these

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (10x1=10)

Q.11 Give one example of discharging agent.

Q.12 _____ is the manual method of printing. (Block/Roller)

Q.13 What is Function of Back Grey.

Q.14 Tie & Die term used indyeing. (True/False)

Q.15 What is Vatting process?

Q.16 Why singeing is necessary before printing?

Q.17 Name two water soluble dyes.

Q.18 What is the role of lint doctor.

Q.19 Block printing is the fastest way of printing. (True/False)

Q.20 _____ dye is preferred for transfer printing?

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

Q.21 What are the various constituents used during preparation of printing paste.

Q.22 Explain direct printing style on cotton.

Q.23 What are the requirements of paper and dye to be used in transfer printing.

Q.24 Write a note on Tie and Dye.

Q.25 Discuss the resist style of printing.
