

- Q.24 Explain the knitting cycle of compound needle.
- Q.25 Tell any five features of interlock structure.
- Q.26 What is the role of cam in knitting process.
- Q.27 Explain different parts of a spring bearded knitting needle.
- Q.28 What do you understand by robbing back in knitting.
- Q.29 List any four merits of latch needle.
- Q.30 Discuss the purl weft knit structure with diagram.
- Q.31 List any five disadvantages of compound needle.
- Q.32 What do you understand by laddering effect?
- Q.33 Discuss about the rib knit structure with diagram.
- Q.34 Differentiate between technical face and back side of knitted fabric structure.
- Q.35 What are the derivatives of plain knit structure.

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 Explain different weft knitting fabric defects along with their reasons in detail.
- Q.37 Explain the knitting cycle of raschel warp knitting machine with well-illustrated diagram.
- Q.38 Discuss the difference between warp knitting and weft knitting in detail.

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 A process of interlacing warp and weft threads to make fabric
- a) Knitting b) Weaving
- c) Spinning d) Crochet
- Q.2 A way to create fabric by interlocking loops of yarn
- a) Weaving b) Spinning
- c) Knitting d) None
- Q.3 Knitting is carried out on a machine called as
- a) Loom b) Knitting machine
- c) Draw farm d) Carding
- Q.4 Horizontal row of loops in a knitted structure is known as
- a) Warp b) Weft
- c) Wale d) Course

(1) 182561/122561/032561

- Q.5 Rib knit structure is a type of
- Warp knit fabric
 - Weft knit fabric
 - Woven fabric
 - None
- Q.6 Two 1x1 rib structure are interlocked together to construct a
- Purl knit
 - Rib knit
 - Interlock
 - Single jersey
- Q.7 Purl knit fabric structure is generally used to produce
- Saree
 - Trousers
 - Kids wear
 - None
- Q.8 The widthwise stretch ability of _____ fabric is more than purl fabric
- Rib knit
 - Plain knit
 - Interlock
 - woven
- Q.9 Raschel knitting machine is used to produce which type of fabrics
- Weft knit fabric
 - Warp knit fabric
 - Both A & B
 - None
- Q.10 Which of the following needle is known as self-actuating needle
- Compound
 - Latch
 - Spring bearded
 - None

(2) 182561/122561/032561

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 List any two examples of knitted fabrics.
- Q.12 What is the function of sinker in knitting machine.
- Q.13 Tell the use of cam in knitting machines.
- Q.14 Warp preparation is required in warp knitting process. (True/False)
- Q.15 _____ needle requires an external element to close the needle hook.
- Q.16 Shogging and swinging motions are carried out in _____ knitting.
- Q.17 Needle butt is responsible for the up and down movement of needle. (True/False)
- Q.18 Give the full form of WPI.
- Q.19 What is the function cam in knitting machine.
- Q.20 Define face loop.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 List any five characteristics of single jersey fabric.
- Q.22 Discuss the types of weft knit stitches.
- Q.23 Explain about the latch needle with diagram.
