

- Q.31 Differentiate between tight rope and slack rope washing machines.
- Q.32 State the importance of drying in textile processing.
- Q.33 Write a short note on cylinder drying.
- Q.34 What is the purpose of mercerisation of cotton yarn or fabric?
- Q.35 List any two physical and two chemical changes that occur during mercerization.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain in detail the purpose of souring and any one methods used for it with neat sketch.
- Q.37 Define mercerisation. Describe the physical and chemical changes that occur in cotton during mercerisation.
- Q.38 Write a detailed note on the sequence of preparatory processes for cotton fabric before dyeing and printing.

No. of Printed Pages : 4

Roll No.

3rd Sem / Textile Proc., Text, Chem Sub : Technology of Bleaching-I

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Shearing and cropping is removal of
a) Protruding fiber b) Wax
c) Oil d) Ends joining
- Q.2 By measuring tape we check for
a) Stains b) Cut
c) Length d) All of these
- Q.3 Stitching is process for
a) Hairy fiber b) Wax
c) Starch d) Ends joining
- Q.4 Scouring efficiency is checked by
a) Dimensional Stability
b) Luster
c) Absorbency
d) None of these
- Q.5 In Saturator we check for
a) ph b) Temp.
c) Pickup d) All of these

(20)

(4) 182633/122633/032633

(1) 182633/122633/032633

- Q.6 Parameters for yarn dyeing
 a) Type of Package b) Type of yarn
 c) Package density d) All of these
- Q.7 Fabric dyeing machine
 a) HTHP b) Padding Mangle
 c) Jigger d) All of these
- Q.8 Process House has
 a) Continuous Process b) Batch Process
 c) Semi Cont. d) All of these
- Q.9 Types of dyes are
 a) Anionic dyes b) Cationic dyes
 c) Nonionic dyes d) All of these
- Q.10 Swelling agents are
 a) Levelling agents b) Carriers
 c) Exhausting agents d) None of these

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Air should be present in Kier machine. (True/ False)
- Q.12 Removal of hairy fibre is done in shearing and cropping. (True/ False)
- Q.13 Washing and rinsing are done ____ dyeing.
- Q.14 Caustic is a strong ____ (Acid/ Alkali)
- Q.15 ____ are removed by stain removal

(2) 182633/122633/032633

- Q.16 Un even singeing is accepted. (True/ False)
- Q.17 Pressure is checked by ____.
- Q.18 Temp is checked by ____.
- Q.19 Wool has affinity for acid dyes. (True/ False)
- Q.20 Cotton is easily damaged by strong alkali. (True/ False)

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Explain grey inspection?
- Q.22 What is the purpose of desizing in textile processing?
- Q.23 List commonly used desizing agents and their functions.
- Q.24 Name and briefly describe any two desizing methods.
- Q.25 State the principle of scouring of cotton.
- Q.26 What is the purpose of scouring coloured woven goods?
- Q.27 Write a short note on high-pressure kier.
- Q.28 What is the function of a J-Box in the scouring process?
- Q.29 What is the purpose of washing and souring in textile processing?
- Q.30 Explain the principle of counter current washing.
