

- Q.29 Write down the concept of blending and its advantages.
- Q.30 Write down the working of Winch dyeing machines.
- Q.31 Why blending of fibres is done also mention its advantages.
- Q.32 What is tailing? Where does it occur?
- Q.33 Write a note on recent developments in dyeing.
- Q.34 Write down the causes and remedies of centre selvedge variations.
- Q.35 Write down the dyeing procedure of Polyester/ wool and polyester / viscose blends.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain dyeing procedure with Beam dyeing machine with a labeled diagram.
- Q.37 Write a short note on
- Continuous dyeing machine
 - Limitation of natural Dyes
- Q.38 Explain the causes and remedies of dyeing defects in dyeing of synthetic and its blends.

5th Sem / Text. Proc

Subject:- Technology of Dyeing - III/ Dyeing & Color Matching

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 _____ dyes combination is used to dye P/C blend material.
- Acid, Reactive
 - Reactive, sulfur
 - Remazol Dye
 - Disperse Reactive
- Q.2 Expensive cotton materials are generally dyed with _____ dyes.
- Direct
 - Azoic Dyes
 - Vat
 - sulfur dye
- Q.3 Yarn is dyed in _____ machine?
- package dyeing
 - Loose stock
 - CDR
 - None of these
- Q.4 _____ pH is maintained while dyeing polyester
- Alkaline
 - Neutral
 - Acidic
 - None of these

- Q.5 Hosiery goods are dyed with _____ machine.
 a) Beam dyeing b) Continuous dyeing
 c) winch d) None of these
- Q.6 _____ machine is used in dyeing fabric?
 a) Beam Dyeing b) package dyeing
 c) Hank dyeing d) none of these
- Q.7 Give examples of Ingrain dyes?
 a) Acid Dyes b) Azoic Dyes
 c) Remazol Dye d) Basic Dyes
- Q.8 Example of natural Dye?
 a) logwood b) Henna
 c) Turmeric d) All of these
- Q.9 Which of the following is/are batch dyeing.
 a) Beam Dyeing b) winch
 c) jigger d) All of these
- Q.10 Cold brand reactive dyes are also represented as _____ dyes.
 a) Procion H b) Procion M
 c) Remazol Dye d) Basic Dyes

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Name two mineral acids.

- Q.12 Define affinity.
- Q.13 List the source of natural dyes.
- Q.14 What is the function of padding mangle.
- Q.15 Define bleeding.
- Q.16 Give two examples of alkalies.
- Q.17 Define chromophore?
- Q.18 Write full form of HTHP.
- Q.19 _____ dye is used to dye acrylic materials.
- Q.20 Write the full form of CCM.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Briefly discuss the causes and remedies of patchy dyeing.
- Q.22 Write a note on importance of computer colour matching.
- Q.23 Write down the working of jigger machine.
- Q.24 Explain the working of beam dyeing machine.
- Q.25 Write down the dyeing procedure of P/C blends.
- Q.26 Write the procedure of dyeing cotton / wool blend.
- Q.27 What is moire defect and its remedies.
- Q.28 Write down the working of soft flow dyeing machines.
