

- Q.26 Mention parameters & related necessary actions in grey inspection.
- Q.27 Mention parameters & method of checking during stitching.
- Q.28 How off shades can be produced even if quality is checked?
- Q.29 Mention PQC in after treatment of printed cloth?
- Q.30 Write flow chart for a fabric taken for printing?
- Q.31 Discuss various stitching defects.
- Q.32 Mention various PQC regarding mercerisation.
- Q.33 Discuss various packages for fiber and yarn packing?
- Q.34 What factors does a dyer consider for dyes selection?
- Q.35 How to overcome various shade variation in jigger?

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Describe various PQC measures taken during Bleaching.
- Q.37 Mention in detail the various control parameters during Kiering.
- Q.38 Explain parameters and precautions for HTHP.

No. of Printed Pages : 4

182665/122665/032665

Roll No.

6th Sem / Text. Proc., Text. Chem.
Subject:- Process Quality Control in
Textile Wet Processing

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 In Grey Inspection we check
- | | |
|-----------|-----------------|
| a) Stains | b) Cut |
| c) Length | d) All of these |
- Q.2 Bleaching is the process
- | | |
|----------------|------------------|
| a) Dimensional | b) Luster |
| c) Absorbency | d) None of these |
- Q.3 Parameters for Scouring are
- | | |
|----------|-----------------|
| a) pH | b) Temp. |
| c) conc. | d) All of these |
- Q.4 Parameters for fiber dyeing are
- | | |
|--------------------|-----------------|
| a) type of Package | b) type of yarn |
| c) Package density | d) All of these |
- Q.5 We go for desizing efficiency
- | | |
|----------------|------------------|
| a) Color | b) hairy fibers |
| c) Weight loss | d) None of these |

(20) (4) 182665/122665/032665

(1) 182665/122665/032665

- Q.6 Production in a process house may be
 a) Continuous Process b) Batch Process
 c) Semicontinuous d) All of these
- Q.7 The process in Kier machine is
 a) Continuous Process b) Batch process
 c) Drying d) None of these
- Q.8 For making process continuous we use
 a) J-Box b) Padding Mangale
 c) Washing Unit d) All of these
- Q.9 Jet dyeing Machine is for
 a) Continuous Process b) Batch process
 c) Semi Continous d) None of these
- Q.10 Drying can be done by
 a) Cylinder b) Hot flue
 c) Float d) All of these

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 _____ (Scouring/Souring) is done in Kier.
- Q.12 _____ (Alkalization/Neutralization) is the process in souring.

- Q.13 _____ (Sizing/Desizing) is the process of application of starch etc.
- Q.14 Heat setting is the process for _____ (dimensional stability/alkalization).
- Q.15 The fabric should be plain during _____ (winding/unwinding) on batch.
- Q.16 Package density should be uniform in package dyeing machine. True/False
- Q.17 Steam leakage should be there in package dyeing machine. True/False
- Q.18 In a process house quality is checked at each stage. (True/False)
- Q.19 Singeing is the process of removal of _____
- Q.20 Seam detector detects the _____

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Mention necessity of process control.
- Q.22 How quality control helps in a process house?
- Q.23 How does a dyer in a dyeing departments work?
- Q.24 How does a dyer in fibre dyeing deptt work?
- Q.25 Mention parameters of Drying process.
