

- Q.19 Describe the method of cotton dyeing with vat dyes.
- Q.20 Explain the working of jigger dyeing machine with neat diagram.
- Q.21 Explain the dyeing of acrylic fiber with basic dyes.
- Q.22 What are the advantages of polyester dyeing at high temperature?

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 Explain the classification of finishes and their importance in textile processing.
- Q.24 Describe the dyeing of cotton with vat and sulphur dyes in detail.
- Q.25 Write a detailed note on mercerization of cotton. Include physical and chemical changes.

No. of Printed Pages : 4

182717

Roll No.

1st Year / Textile Tech. Subject : Textile Chemistry

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 What is the primary purpose of singeing in textile processing?
- Improve softness
 - Remove stains
 - Remove protruding fibers
 - Enhance color strength
- Q.2 The main substance removed during degumming of silk is
- Cellulose
 - Keratin
 - Sericin
 - Pectin
- Q.3 Mercerization is done to cotton to:
- Remove oil
 - Improve luster and dye affinity

- c) Remove color
 - d) Soften fabric
- Q.4 Which dye is suitable for dyeing polyester?
- a) Direct dye b) Basic dye
 - c) Disperse dye d) Acid dye
- Q.5 What is the principle of scouring?
- a) Color Fixing
 - b) Removal of foreign matter
 - c) Fiber expansion
 - d) Flame proofing
- Q.6 Block printing is categorized under:
- a) Roller method
 - b) Mechanical printing
 - c) Hand printing
 - d) Screen printing

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 Scouring of wool is done to remove _____.
(Grease and Suint / Starch)

- Q.8 Acrylic is dyed using _____ dyes. (Disperse / Basic)
- Q.9 The process of heat setting helping in _____ stability. (strength / Dimensional)
- Q.10 Reactive dyes form _____ bonds with cotton. (Covalent / Non ionic)
- Q.11 Bleaching with sodium hypochlorite works best at pH _____. (9-10 / 2-3)
- Q.12 Mercerization is carried out using _____ solution. (Caustic soda / HCL)

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 Explain the importance of wet processing in textiles.
- Q.14 Write the principle and process of scouring for wool.
- Q.15 What is degumming of silk? Explain its process and chemicals used.
- Q.16 Discuss bleaching of cotton with hydrogen peroxide with recipe, pH stabilizers.
- Q.17 Explain the process of carbonization in wool.
- Q.18 What is the principle of dyeing? Discuss role of water in dyeing.
