

- Q.28 Write down the salient features of High Production card.
- Q.29 Write down the maintenance schedule of carding machine.
- Q.30 How will you calculate the cleaning efficiency of blow room? Explain with an example.
- Q.31 What is yarn numbering system? Explain direct yarn numbering system.
- Q.32 Differentiate between carding action and stripping action.
- Q.33 Write a short note on flexible and metallic card clothing.
- Q.34 Write a short on defects in card web and their removal.
- Q.35 What is web doffing? What is the roll of doffer comb in the doffing of web?

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Calculate production of carding machine running at 95 mpm with sliver hank 0.128 and Efficiency 93%.
- Q.37 Write down the process control parameters in mixing, blow room and carding machine.
- Q.38 Write down the objectives of calendar roller in Scutcher and draw the passage of cotton sheet through them.

No. of Printed Pages : 4
Roll No.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Neps are removed at ____ machine.
a) Blowroom b) Drawframe
c) Weaving d) Carding
- Q.2 ____ is a/the important part of blowroom?
a) Bale plucker b) Unimix
c) ERM d) All of the above
- Q.3 Auto leveller is used at ____ machine.
a) Blow room b) Carding
c) Simplex d) Ringframe
- Q.4 Neps are highly increased at ____ machine.
a) Blow room b) Draw frame
c) Weaving d) Carding
- Q.5 Unidirectional feed is associated with which machine?
a) Blow room b) Draw frame
c) Comber d) Carding

- Q.6 Wider the gauge between cylinder and flats in carding machine will results in ____ neps.
 a) Increased b) Decreased
 c) Same d) Cannot say
- Q.7 Least wire height found in
 a) Blow room beater
 b) Draw frame
 c) Cylinder of carding machine
 d) Doffer
- Q.8 Ginning is the process to remove the ____ from the cotton fibres.
 a) Fibre b) Neps
 c) Seed d) Waste
- Q.9 Highest waste found at carding machine is ____ waste.
 a) Licker-in b) Cylinder
 c) Flat d) Doffer
- Q.10 Carding working efficiency (%) mostly found in the range of ____.
 a) 20-30 b) 40-60
 c) 60-80 d) 80-95

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 What is Neps?

- Q.12 Blow room is used for ____ and cleaning?
- Q.13 Primary objective of carding is ____.
- Q.14 Draft between feed roll to licker-in ____ at carding machine.
- Q.15 Blow room is used for ____ and cleaning?
- Q.16 Cleaning efficiency of blow room is ____ (%)'
- Q.17 Write down main objective of cylinder in carding machine.
- Q.18 Lap-Licking is a ____?
- Q.19 Carding action is done between ____ and ____.
- Q.20 Grid bars are used to remove ____.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Why blending of polyster and cotton is not done at blow room stage.
- Q.22 Give objects of Blowroom.
- Q.23 Give objects of carding.
- Q.24 Differentiate between mixing and blending in tabulated form.
- Q.25 What are the different defects in lap?
- Q.26 What is the objective of grinding and explain the type of grinding done on carding machine?
- Q.27 Write down the functions of flats in a carding machine and also draw the diagram of flat wire.
