

- Q.28 Describe the role of selvedge in the Fabric.
- Q.29 Write the special feature of shuttle used for automatic looms.
- Q.30 Calculate the production in meters of a water Jet loom running at 750 PPM at 88% efficiency for 8 hours, producing a fabric with 75 PPI.
- Q.31 What is the role of weft feeler in automatic Loom?
- Q.32 Write the feature of terry fabrics.
- Q.33 List out the disadvantages of Shuttle looms.
- Q.34 Classify the Non-conventional looms.
- Q.35 Differentiate between Automatic and Non Automatic Loom.

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 Explain the working of Electrical warp stop mechanism with neat and clean sketch
- Q.37 Explain the working of Automatic Cop Change Mechanism along with neat and clean sketch.
- Q.38 Name the different types of fabric defects along with their causes and remedies.

5th Sem / Text. Tech. Subject:- Weaving Technology - III

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Which fabric production method has minimum production rate
- a) Weaving b) Knitting
c) Non-woven d) All of these
- Q.2 Which process is eliminated in shuttle less weaving?
- a) warping b) Sizing
c) Pirn winding d) Beaming
- Q.3 Airjet loom is _____ than the shuttle loom.
- a) Equally noisy b) More noisy
c) Less noisy d) None of these
- Q.4 When the last pick is pushed up to the cloth fell is known as _____.
- a) Beat-up b) Take up
c) Let-off Motion d) Picking
- Q.5 Which of the following mechanism is used to replace the empty shuttle with a full one?
- a) Cop changing mechanism

- b) Shuttle changing mechanism
 - c) Weft accumulator
 - d) Selvedge mechanism
- Q.6 The weft feeler which causes minimum damage to weft is
- a) Mechanical feeler
 - b) electrical feeler
 - c) Photo electrical feeler
 - d) None of the above
- Q.7 Waterjet looms are also known as _____ looms.
- a) Griper b) Hydraulic
 - c) Pneumatic d) Rapier
- Q.8 Shuttleless looms were developed mainly to:
- a) Reduce loom cost
 - b) Increase speed and productivity
 - c) Reduce warp tension
 - d) Produce handloom effects
- Q.9 Which is the fastest weft insertion method among shuttleless looms
- a) Air jet b) Water jet
 - c) Gripper d) Rapier
- Q.10 Water-jet loom is not suitable for _____.
- a) Hydrophobic yarn
 - b) Cotton yarn
 - c) Polyester filament yarn
 - d) Nylon filament yarn

(2) 182753/122753/032753

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Machine used for making the fabric is called _____
- Q.12 Expand the term GSM.
- Q.13 List out the fabric specifications.
- Q.14 _____ type selvedge cannot be produced in cotton fabrics.
- Q.15 In Air jet looms the weft is inserted by _____.
- Q.16 What is Loom Efficiency?
- Q.17 What is shuttle protector Motion?
- Q.18 Expand the term PPM.
- Q.19 Name the different types of warp stop motions.
- Q.20 Expand the term PPI.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Draw Leno Selvedge.
- Q.22 What is the Role of Weft cutter in shuttle Less Looms?
- Q.23 Classify different types of Temples.
- Q.24 Describe the Role of Weft measuring motion.
- Q.25 Classify the Fabric Defects?
- Q.26 Compare the Shuttle and Shuttle less Looms.
- Q.27 Write the function of temples in a loom.
