

- Q.27 Discuss the relationship between the cost of quality and the overall profitability of a business.
- Q.28 What is Modular Production system?
- Q.29 What do you understand by 4 Point system?
- Q.30 Write down methods of improve productivity?
- Q.31 What is the concept of Ergonomics.
- Q.32 List five common defects found during garment inspection and explain how they might impact the product.
- Q.33 Explain the key differences between a bundle system and a modular system in garment production.
- Q.34 Explain the concept of motion study and its significance in garment manufacturing.
- Q.35 Identify and explain any four challenges that can hinder the productivity of a garment manufacturing unit.

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 Define the terms “Processing Time,” “Transportation Time”, “Waiting Time,” and “Inspection Time” in the context of garment production.
- Q.37 Define various type of inspection and explain the importance of inspection.
- Q.38 Write down the process of material handling and how it can be beneficial for garment industry.

No. of Printed Pages : 4 183142/123142/033151
Roll No.

4th Semester/ Fash. Design Subject : Apparel Management & Quality Control

Time : 3 Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 which of the following is a key factor that affects both production and productivity?
- Inflation rate
 - Interest rate
 - Technology & Capital Investment
 - Exchange rate
- Q.2 Which of the following is NOT required equipment for time study?
- Stopwatch
 - Time study board
 - Chair
 - Steel ruler
- Q.3 Ergonomics is a body of knowledge concerned with :
- Human abilities
 - Design of tools, machines, systems, tasks, jobs and environments
 - Fitting the job or task to the person
 - All of the above
- Q.4 What is another name for method study?
- Motion study
 - Work simplification
 - Motion study and work simplification
 - Work measurement

- Q.5 Material handling consists of movement of material from
- One machine to another
 - One shop to another shop
 - Stores to shop
 - All of the above
- Q.6 Modular Production systems are often implemented to improve:
- Production speed
 - Cost reduction
 - Teamwork and quality
 - All of the above
- Q.7 What is the primary goal of Quality Assurance (QA) in garment manufacturing?
- To find defects in finished products
 - To ensure quality is built into every stage of the production process
 - To reduce the cost of production
 - To increase production speed
- Q.8 What is fabric performance testing?
- Assessing the strength and durability of the fabric
 - Ensuring the fabric meets specific colour fastness standards
 - Testing the fabric for shrinkage and pilling resistance
 - All of the above
- Q.9 What does a fabric inspection typically involve?
- Checking for colour variations and fabric defects
 - Measuring fabric width and length
 - Assessing the quality of the fabric's weave
 - All of the above
- Q.10 What does "Idle time" in production refer to?
- Time when machines are running at full capacity
 - Time when workers are actively engaged in production
 - Time when machines or workers are not productive
 - Time spent on quality control

(2) 183142/123142/033151

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (10x1=10)

- Q.11 Mention one cost of quality.
- Q.12 What does AQL stands for?
- Q.13 What are quality specifications?
- Q.14 Give one advantage of Modular production system.
- Q.15 What is WIP?
- Q.16 Name one method of studying work efficiency.
- Q.17 Ergonomics is a study of _____.
- Q.18 What is the size of major defect?
- Q.19 Name on benefit of Time Study.
- Q.20 What is pre inspection?

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Explain the difference between production and productivity in the context of a garment factory.
- Q.22 Describe one garment assembly system and explain how it impacts production flow.
- Q.23 What is the primary purpose of time study in garment manufacturing?
- Q.24 What are the main factors to consider when selecting a production system for a specific garment manufacturing facility?
- Q.25 Highlight the benefits of conducting regular quality inspections in garment factory.
- Q.26 Differentiate between unit load and bulk material handling.
