

- Q.26 Distinguish between probability and non-probability sampling.
- Q.27 Briefly explain stratified random sampling with an example.
- Q.28 What are the different types of data? Give two examples of each.
- Q.29 Explain the observation method of data collection. What are its merits?
- Q.30 What is data editing? Why is it considered an important step?
- Q.31 What is data tabulation? Explain its purpose.
- Q.32 Explain the concept of data analysis and data interpretation.
- Q.33 Explain the significance of the t-test in statistical analysis.
- Q.34 What is report writing? What is its significance in research?
- Q.35 Discuss the layout of the research report.

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 Describe the various types of research designs in detail.
- Q.37 Explain the different methods of data collection, highlighting the merits and demerits of each.
- Q.38 Describe the steps involved in a good research report writing. Also, discuss the precautions to be taken while writing a research report.

No. of Printed Pages : 4

Roll No.

5th Sem / DBM, DBM (IPM) Subject:- Research Methodology

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 A study to understand the lifestyle of a specific tribe would be an example of:
a) Applied research
b) Descriptive research
c) Casual research
d) Experimental research
- Q.2 A testable statement that predicts a relationship between variables is a :
a) Research question b) Research problem
c) Hypothesis d) Research design
- Q.3 Which of the following is not a characteristic of a good hypothesis?
a) Simple and clear
b) Verifiable
c) Subjective and vague
d) Related to existing theories
- Q.4 The process of selecting a subset of a population is called:
a) Sampling b) Tabulation
c) Data collection d) Research design
- Q.5 Which of the following is a type of probability sampling?

(40)

(4)

/073426/106745

(1)

186755-I/126755-I
/073426/106745

- a) Convenience sampling
 - b) Quota sampling
 - c) Stratified sampling
 - d) Judgmental sampling
- Q.6 A survey conducted through a face-to-face conversation is an example of:
- a) primary data collection
 - b) Secondary data collection
 - c) Both (a) and (b)
 - d) None of the above
- Q.7 The process of checking collected data for errors and inconsistencies is known as :
- a) Tabulation b) Editing
 - c) Analysis d) Interpretation
- Q.8 The type of sampling where the researcher select a sample based on their convenience is:
- a) Systematic sampling
 - b) Stratified sampling
 - c) Quota sampling
 - d) Convenience sampling
- Q.9 Which of the following is not a part of the main body of a research report?
- a) Introduction b) Methodology
 - c) Literature review d) Bibliography
- Q.10 What is the main purpose of research ?
- a) To guess new facts
 - b) To find new knowledge
 - c) To copy old information
 - d) To play games

SECTION-B

- Note:** Objective type questions. All questions are compulsory. (10x1=10)
- Q.11 A hypothesis is always proven to be true by the end of the research.(True/False)

- Q.12 The population is the entire group from which a sample is drawn.(True/False)
- Q.13 Non-probability sampling methods give every element an equal chance of being selected. (True/False)
- Q.14 Primary data is collected from existing sources like books and journals.(True/False)
- Q.15 A questionnaire is a common method of collecting primary data.(True/False)
- Q.16 Tabulation is the process of arranging data in a systematic manner in rows and columns. (True/False)
- Q.17 Data interpretation involves drawing conclusions from the data.(True/False)
- Q.18 A t-test is used for comparing more than two population means.(True/False)
- Q.19 The layout of a research report should be logical and structured.(True/False)
- Q.20 Observation is a method of collecting primary data. (True/False)

SECTION-C

- Note:** Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)
- Q.21 What is the meaning of research? Explain its main objectives.
- Q.22 Define research design. What is its significance in the research process?
- Q.23 Explain the concept of a hypothesis and its role in a research study.
- Q.24 Describe the different types of a simple hypothesis.
- Q.25 What is sampling? Why is it necessary in research?
