

(1) 187744/147744

- Q.5 For contactless body temperature measurement, advances thermometers are used. They are based on :
- Infrared radiation
 - Ultraviolet radiation
 - Alpha particles
 - Laser beams
- Q.6 Which Instrument that measures the height of an aircraft above a given pressure level
- Airspeed Indicator
 - Altimeter
 - Heading Indicator
 - Vertical Speed Indicator
- Q.7 The turn indicator indicates rotation about the _____.
- Horizontal axis
 - Vertical axis
 - Longitudinal axis
 - Diagonal axis
- Q.8 Where is the alternative static port located?
- Inside the wings of the aircraft
 - Inside the rudder of the aircraft
 - Inside the engine of the aircraft
 - Inside the cabin of the aircraft
- Q.9 Which of the following can replace a heading indicator?
- Horizontal situation indicator
 - Vertical situation indicator
 - Horizontal path indicator
 - Vertical path indicator
- Q.10 The top half of the attitude indicator is _____.
- Green
 - Blue
 - Brown
 - Yellow

(2) 187744/147744

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (10x1=10)

- Q.11 What instrument is used to measure RPM?
- Q.12 Name pitot-based instruments?
- Q.13 What is a lead test?
- Q.14 What is the importance of quality assurance in testing?
- Q.15 Mention some electrically operated instruments.
- Q.16 What is the importance of content gauge?
- Q.17 How does gyroscope based instrument work?
- Q.18 What is the principle behind VSI?
- Q.19 What is the principle of operation of Altimeter?
- Q.20 What is a position error?

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Explain AS9100 certification?
- Q.22 How manifold pressure gauge works?
- Q.23 Describe position error leak test.
- Q.24 What are the different Quality System standards?
- Q.25 Explain fuel flow gauge.
- Q.26 Write short note on operational test of instruments.
- Q.27 How does suction gauge work.
