

188432

Subject : Engineering Science

M.M. : 50

SECTION-A

compulsory. (5x1=5)

- Q.1 What is the melting point of standard solder?
a) 90°C b) 183°C
c) 250°C d) 400°C
- Q.2 Which of the following is an advantage of brazing over welding?
a) higher strength
b) no need for filler metal
c) lower temperature requirement
d) can join dissimilar metals
- Q.3 What type of flux is commonly used in soldering?
a) acid flux b) rosin flux
c) water flux d) alkaline flux
- Q.4 Which type of earthing uses a copper plate buried in the ground?
a) pipe earthing b) Plate earthing
c) rod earthing d) strip earthing

- Q.5 What is the function of a moving coil in a voltmeter?
- a) to deflect due to magnetic field
 - b) to increase resistance
 - c) to converts ac to dc
 - d) to reduce voltage

SECTION-B

Note: Objective type questions. All questions are compulsory. (5x1=5)

- Q.6 Name two types of solders used in soldering.
- Q.7 List two defects in soldering.
- Q.8 Mention two advantages of brazing.
- Q.9 What is the main purpose of an ohm meter?
- Q.10 Name two types of wiring used in residential buildings.

SECTION-C

Note: Short answer type questions. Attempt any six questions out of Eight questions. (6x5=30)

- Q.11 List three advantages of soldering over welding.
- Q.12 Describe the function of a megger meter.

- Q.13 Differentiate between single-sided and double-sided PCBs.

- Q.14 Explain the working principle of a moving iron ammeter.

- Q.15 What are the causes of earthing faults?

- Q.16 Explain the importance of a distribution board.

- Q.17 Define concealed wiring and its advantages.

- Q.18 What is the role of a dynamometer wattmeter.

SECTION-D

Note: Long answer type questions. Attempt any one questions out of two questions. (1x10=10)

- Q.19 Describe the construction and working of an Induction-type energy meter.
- Q.20 Discuss the factors to be considered while selecting a particular wiring system.
