

No. of Printed Pages : 4
Roll No.

188751

Level 5, 1st Sem / DVOC (Production Tech.)

Subject : General Mechanical Engineering - II

Time : 2 Hrs.

M.M. : 50

SECTION-A

Note: Very short answer Questions. Attempt all ten questions. (10x1=10)

- Q.1 Define work.
- Q.2 What is Heat capacity.
- Q.3 Give the statement of second law of thermodynamics.
- Q.4 What is an adiabatic process?
- Q.5 Petrol engine works on _____ cycle.
- Q.6 What is the work done in constant volume process?
- Q.7 What is a irreversible process?
- Q.8 Define compression ratio.

Q.9 Which fuel is used in IC engines?

Q.10 Give clausius statement.

SECTION-B

Note: Short answer type questions. Attempt any six questions out of Eight questions. (6x5=30)

Q.11 Explain the parameters of working body and their units.

Q.12 Explain the carnot cycle with PV diagram.

Q.13 Calculate work done in raising the temperature of a gas from 20 degrees C to 50 degree C at a constant pressure of 20 N/m².

Q.14 Explain the construction and working of Babcock and Wilcox boiler.

Q.15 What are the advantages and disadvantages of external combustion engine?

Q.16 Explain the method of determination of heat capacity of a thermodynamics process.

Q.17 Explain the location, function and working of aircooler in gas turbine.

Q.18 Explain the construction and working of diesel engine.

SECTION-C

Note: Long answer type questions. Attempt any one questions out of two questions. (1x10=10)

Q.19 Explain the principle, construction and working of gas turbine.

Q.20 Classify steam condensers and explain any one.
