

- Q.25 A vertical cylinder of diameter 50mm and 70mm height is cut by a sectional plane inclined at 30° to H.P. and passes the axis of the cylinder at a distance of 40mm from base. Draw the development of the truncated cylinder.
- Q.26 The detail of Gib and Cotter joint are given below. Assemble the parts together and draw
 (a) From view upper half in section.
 (b) Side view (c) Top view
 Adopt suitable scale, Use first angle projection system.

No. of Printed Pages : 4
 Roll No.

202015

1st Year / Advance Diploma in Tool and Die Making
Subject:- Engineering Drawing

Time : 4Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory
 (10x1=10)

- Q.1 _____ is used to draw curves which are not circular.
 a) Compass b) Protractor
 c) French Curves d) Pro Circle
- Q.2 The Grade becomes _____ according to the figure placed in front of the letter B, 2B, 3B, 4B etc.
 a) harder b) lighter
 c) darker d) softer
- Q.3 What does the "Single-Stroke" lettering mean?
 a) Cursive writing.
 b) Uniformity in letters as obtained in one stroke of the pencil
 c) Writing in one stroke without lifting the pencil
 d) Writing only with hard, small diameter lead-pencil
- Q.4 In engineering drawing, which type of line indicates that there is a change of plane?
 a) Continuous thin wavy
 b) Long chain thin
 c) Continuous thick
 d) Medium thick short dashes
- Q.5 In the Oblique projection an object is represented by how many views?
 a) one view b) two views
 c) three views d) four views

- Q.6 What is additional 3rd view on orthographic projection in general for simple objects?
- Front view
 - Top view
 - Side view
 - View at 45 degrees perpendicular to horizontal plane
- Q.7 If isometric projection of an object is drawn with true lengths the shape would be same and size is how much larger than actual isometric projection?
- 25%
 - 29.5%
 - 22.5%
 - 33.3%
- Q.8 The relation between mating parts is called _____
- Connection
 - Fits
 - Joints
 - Link
- Q.9 Which of the following joints two rotating shafts to each other?
- Key
 - Belt drive
 - Gear
 - Coupling
- Q.10 Lower deviation is the algebraic difference between the _____ and corresponding basic size.
- actual size
 - design size
 - maximum limit of the size
 - minimum limit of the size

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Define storage
- Q.12 Write the size of the trimmed A3 sheet in mm.
- Q.13 Define scale.
- Q.14 Give types of dimensioning.
- Q.15 Draw the conventions for hidden line.
- Q.16 Define tolerance.

(2)

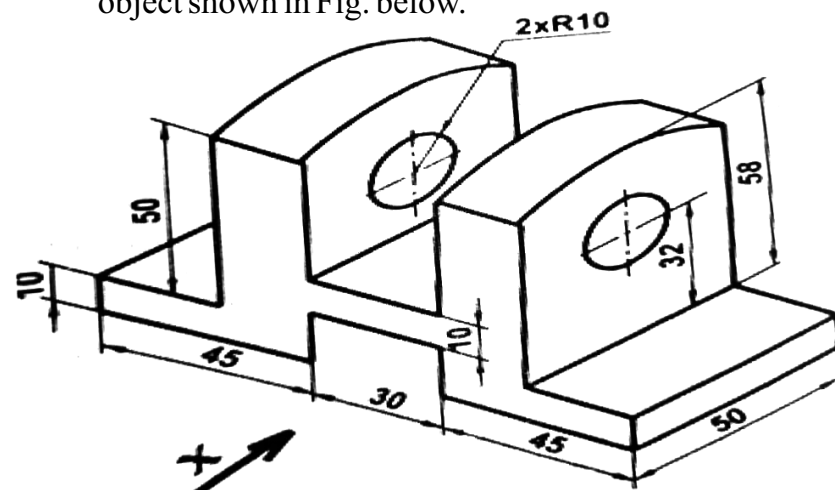

202015

- Q.17 Write use of washer.
- Q.18 Write an example of temporary joint.
- Q.19 Describe detail drawing.
- Q.20 Define cotter.

SECTION-C

Note: Attempt any four questions out of six questions. (Assume missing dimensions if any.) (4x20=80)

- Q.21 Draw the plan and elevation of a line 40mm long which is parallel to VP, 15mm in front of it and inclined at 45° with the HP. The left end is 15mm above it.
- Q.22 a) Draw free hand sketch of Rag bolt.
b) Draw in proportionate free hand sketch; the top view and sectional front view of a single riveted lap joint; when the diameter of the rivet is 18 mm.
- Q.23 a) Write freehand the following, using single stroke vertical CAPITAL letters of 5 mm (h) size. "ENGINEERING GRAPHICS IS IMPORTANT FOR ENGINEERS"
b) Show types of fits with figure.
- Q.24 Draw the top view, front view, and side view of the given object shown in Fig. below.

(3)

202015
