

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Write the advantages, disadvantages and applications of resistance welding.
- Q.22 Write the limitations and applications of laser beam welding.
- Q.23 What should be the properties of materials used for pattern making?
- Q.24 Write important characteristics of natural sand.
- Q.25 Explain bench moulding.
- Q.26 Explain floor moulding.
- Q.27 Explain machine moulding.
- Q.28 Write disadvantages of true centrifugal casting.
- Q.29 Explain in brief slush casting.
- Q.30 Explain pencil gate.
- Q.31 Explain wedge gate.
- Q.32 Give some examples of shaper work.
- Q.33 Explain working principle of shaper.
- Q.34 Give some examples of work on a milling machine.
- Q.35 Explain the principle of working of milling machine.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Differentiate between slotter and planer.
- Q.37 Explain broaching techniques.
- Q.38 Explain different materials used for milling cutters.

No. of Printed Pages : 4

202024

Roll No.

2nd Year / Advanced Diploma in Tool and Die Making Subject:- Workshop Technology-II

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 Which type of electrode are used in the resistance seam welding?
 - a) flat
 - b) disc
 - c) domed
 - d) pointed
- Q.2 Slag inclusion is a
 - a) flux
 - b) welding defect
 - c) coating
 - d) solder
- Q.3 Spatter occurs due to
 - a) arc blow
 - b) gas and entrapment
 - c) c stresses
 - d) none of the above
- Q.4 Consumable electrodes are used in
 - a) tig welding
 - b) mig welding
 - c) both (a) and (b)
 - d) none of these
- Q.5 Slick is used for
 - a) repairing the damaged mould
 - b) ramming the mould
 - c) drying the mould
 - d) cleaning the moulding sand

- Q.6 Which of the following is a moulding tool
 a) crucible b) slag
 c) swab d) all of the above
- Q.7 The planer occupies _____ floor space as to shaper.
 a) equal b) less
 c) more d) none of these
- Q.8 in a planer tool is
 a) stationary b) reciprocates
 c) job is stationary d) none of these
- Q.9 The process of removing metal by pulling or pushing a cutting tool is called
 a) up milling b) down milling
 c) broaching d) forming
- Q.10 The front teeth of a broach
 a) remove minimum metal
 b) remove maximum metal
 c) remove no metal d) none of these

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Rear teeth of a broach _____
 a) remove minimum metal
 b) remove maximum metal
 c) remove no metal d) none of these
- Q.12 The length of pull broach is _____ as compared to push broach.
 a) shorter b) equal
 c) longer d) none of these

(2)

202024

- Q.13 The commonly used material for broach is _____
 a) mild steel b) high carbon steel
 c) high speed steel d) ceramic
- Q.14 A single piece broach also known as
 a) build up broach b) solid broach
 c) burnishing broach d) all of these
- Q.15 Cutter in a milling machine is mounted on _____
 a) bracket b) arbor
 c) tool post d) none of these
- Q.16 A radial drilling machine has
 a) Spindle mounted on vertical column
 b) Spindle mounted on radial arm
 c) a revolving column
 d) none of these
- Q.17 A sleeve is used for holding
 a) parallel shank drill
 b) small diameter drill of a numbered size
 c) taper shank drill
 d) none of these
- Q.18 For locating components having drilled holes the locator employed is
 a) flat locator b) jack pin locator
 c) cylindrical locator d) fixed v locator
- Q.19 Jigs are used to hold work in
 a) milling b) turning
 c) planing d) drilling
- Q.20 Fixtures are used to hold work in
 a) drilling b) reaming
 c) tapping d) demilling
