

- Q.28 Write the role of CAD software in mould design.
- Q.29 Write a short note on cooling and heating circuit of a mould.
- Q.30 Write a short note on plastics processing software packages.
- Q.31 Classify various software packages.
- Q.32 Why are the quality requirement pertaining to mould?
- Q.33 Draw neat sketch layout of runner and gating system.
- Q.34 What are the need of evaluation of conceptual design?
- Q.35 Explain the information required to make a mould design and factors on which the design depends.

SECTION-D

- Note:** Long answer type questions. Attempt any two questions out of three questions. (2x10=20)
- Q.36 Explain the principle of selection of standard elements for a mould. Draw standard element and explain their nomenclature.
- Q.37 What are the features need to be calculated before designing a mould? Describe each feature in detail.
- Q.38 Explain the main parts by drawing assembly and detailed drawing of a mould.

No. of Printed Pages : 4
Roll No.

202028

2nd Year / Advance Diploma in Tool and Die Making Subject:- Tool Design Practice-II (Plastic Moulds)

Time : 4Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 The drawing which represents the rough idea of the actual design is called _____
- a) conceptual sketch b) conceptual elevation
c) conceptual digit
d) conceptual parameters
- Q.2 If design is carried out in CAD software then what should be the scale of design?
- a) full scale b) half scale
c) quarter scale d) tenth scale
- Q.3 Which type of mould is called runner less mould?
- a) Compression mould b) Blow mould
c) Cold runner mould d) Hot runner mould
- Q.4 Transparent soft-drink bottles are made from which plastic material:
- a) PVC b) PET
c) UF d) PP

- Q.5 During transfer moulding, plastic material is transferred into a chamber is called
- SPURE
 - POT
 - MOULD CAVITY
 - NONE
- Q.6 In compression moulding the curing time is _____
- Less
 - Moderate
 - More
 - None
- Q.7 Which of the following software can't be categorized application software?
- DBM
 - MS-DOS
 - Spreadsheet
 - Word processing
- Q.8 Thermosetting plastic materials _____?
- Can be repeatedly melted
 - Is useful for melt casting
 - Cannot be melted after forming
 - Is useful for spinning
- Q.9 What is the disadvantage of hand molding?
- Damage to the projections
 - Costly method
 - Non-uniform strength
 - Poor surface finish of the mold
- Q.10 Draft is provided for:
- Improving strength of component
 - Easy removal of component
 - increases stiffness
 - Proper shrinkage

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Write full form of CAD.
- Q.12 Write use of conceptual design.
- Q.13 Write use of drawing norms.
- Q.14 Define mould housing.
- Q.15 Define work sheet.
- Q.16 Write the use of information data sheet.
- Q.17 Give function of allowance in a mould.
- Q.18 Define mould data.
- Q.19 Write one application of a software package in mould design.
- Q.20 What is edge gate?

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Explain the process of selection of optimal design.
- Q.22 What are the uses of design data sheet?
- Q.23 Write a short note on shrinkage and allowances in mould design.
- Q.24 Write the main properties of mould material.
- Q.25 Explain the process of selecting optimum design.
- Q.26 What is significance of cooling and heating circuits in moulds?
- Q.27 Explain concept of processing parameters.
