

- Q.5 Which is the following has high machining Speeds in laser Beam Machining?
- a) Metals b) Non Metals
c) Metal alloys d) All of the mentioned
- Q.6 What are the non elements of Carrier fluid?
- a) Act as heating and melting fluid
b) At as bond between the work piece and the tool
c) Helps efficient transfer of energy
d) Act as medium to carry the abrasive
- Q.7 For inducing ultrasonic vibrations by converting electrical energy into mechanical vibration, the _____ is used.
- a) Ammeter b) Voltmeter
c) Piezoelectric crystals d) Frequency crystal
- Q.8 In plasma arc welding the Electrode is made of
- a) Tungsten b) Copper
c) Brass d) Steel
- Q.9 Which non conventional machining process has highest material removal rate?
- a) USM b) ECM
c) AJM d) PAM
- Q.10 Which is not an explosive material?
- a) KCN b) RDX
c) TNT d) PETN

(2) 202432/122432/062432

SECTION-B

- Note:** Objective/ Completion type questions. All questions are compulsory. (10x1=10)
- Q.11 Give two advantages of unconventional machining process?
- Q.12 _____ the process of using strong acid to cut into the unprotected parts of a metal surface.
- Q.13 _____ are abrasives used in AJM.
- Q.14 Expand LBM.
- Q.15 Photolithography is a type of patterning technique. (True/False)
- Q.16 The process of cutting a surface with hydraulic shock of a fluid is known as _____.
- Q.17 What is water hammer?
- Q.18 In Plasma arc welding the electrode is made of _____.
- Q.19 The tool of USM has _____ motion.
- Q.20 Name any two abrasives.

SECTION-C

- Note:** Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)
- Q.21 Explain the process of WEDM with diagram.
- Q.22 Write the applications of IBM.
- Q.23 Discuss the principle of abrasive jet machining.
- Q.24 Write short note on Electronic device manufacturing.
- Q.25 What are the limitations of non-conventional manufacturing process?
- Q.26 Discuss metalizing process.
- Q.27 Draw the neat sketch of chemical machining.
