

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

- Q.23 Discuss the manufacturing process of Ethanol with the raw materials, reaction, mechanisms, and catalysts used and flow sheet.
- Q.24 With neat and clean flow sheet, describes about the process of phenol, including the chemical reactions involved, raw materials, and process conditions.
- Q.25 Write short note on any three:-
- IUPAC Naming
 - list of Petrochemical plant in India
 - Butanol
 - Transportation of crude oil

No. of Printed Pages : 4

220662

Roll No.

6th Sem / Chemical (Pulp & Paper)

Subject : Petroleum Technology and Petrochemical

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

- Q.1 Which of the following is a product of fractional distillation of crude oil?
- Methanol
 - Gasoline
 - Vinyl Chloride
 - Acetone
- Q.2 Which of the following is an example of an alkene?
- Methane
 - Ethene
 - Butane
 - Propane
- Q.3 Which of the following is a C1 compound?
- Methanol
 - Acetone
 - Butanol
 - Vinyl Chloride

- Q.4 Which of the following is the primary use of acetone?
- a) Paint solvent b) Gasoline additive
c) Cleaning agent d) All of the above
- Q.5 What is a major hazard in chemical industries related to safety?
- a) High temperature b) High pressure
c) Fire and explosions d) Both A and B
- Q.6 Which of the following is an example of an aromatic compound?
- a) Benzene b) Methane
c) Ethylene d) Propane

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

- Q.7 The composition of crude oil primarily consists of_____.
- Q.8 The chemical formula of benzene is_____.
- Q.9 Name the component, which is removed during the desalting process in petroleum refining?
- Q.10 The functional group present in aldehydes is_____.

(2)

220662

- Q.11 One of the major fire hazards in the chemical industry is_____.
- Q.12 Aromatic compounds are characterized by the presence of a _____ ring.

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

- Q.13 Write about the distillation of crude oil.
- Q.14 Explain the manufacturing of methanol with its chemical reaction.
- Q.15 With flow diagram of a petroleum refinery, explain about the refinery products.
- Q.16 Different between Hazard, safety and prevention.
- Q.17 Write the principles of IUPAC naming used for various organic compounds, like allkanes and alkanes compounds.
- Q.18 Write down about production of Acetone.
- Q.19 Explains about the importance of safety in chemical industry.
- Q.20 Classify the Petroleum.
- Q.21 Define Petrochemical and explain various type of raw material used for petrochemical.
- Q.22 Write properties and uses of vinyl chloride.
