

Q.21 Explain any one moulding machine with construction and Diagram.

Q.22 Explain various materials used for mould parts.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x8=16)

Q.23 Explain Injection moulding and Blow moulding.

Q.24 Explain types of injection moulding machine with detailed construction.

Q.25 What are the factors used in maintenance of mould and storage of mould?

No. of Printed Pages : 4
Roll No.

221852

5th Sem / Mechanical (Tool & Die Design)

Subject : Plastic Mould Design and Drawing

Time : 3 Hrs.

M.M. : 60

SECTION-A

Note: Multiple choice questions. All questions are compulsory (6x1=6)

Q.1 How is the Die used in injection moulding cooled?

- a) oil
- b) Air
- c) Water
- d) contact with cold surface

Q.2 Where does the granular moulding material get loaded into?

- a) Barrel
- b) Hopper
- c) Pellets
- d) Split

Q.3 The plastic Which soften when heat is applied with or without pressure, But required cooling to set them shape are called as

- a) Thermosoftening material
- b) Thermosetting material
- c) Thermoplastic material
- d) Thermostating material

Q.4 The long plastic rods and tubes are produced by_____.

- a) Compression moulding
- b) Extrusion
- c) Injection moulding
- d) Blow moulding

Q.5 The process of producing Thin sheets by Squeezing a thermoplastic material between revolving cylinder is known as _____.

- a) Transfer moulding b) Injection moulding
- c) Blow moulding d) Calendering

Q.6 Identify the product That can be not made by compression moulding process.

- a) Automotive panels
- b) Washing machine housing
- c) Bottles
- d) Gaskets

SECTION-B

Note: Objective/ Completion type questions. All questions are compulsory. (6x1=6)

Q.7 What is Feeding system?

Q.8 Define Runners.

Q.9 Write any two moulding Defects.

Q.10 Define mould ventilation.

Q.11 Define tempering.

Q.12 Define Hardening.

SECTION-C

Note: Short answer type questions. Attempt any eight questions out of ten questions. (8x4=32)

Q.13 Explain basic principles of moulding process.

Q.14 Explain thermoforming process.

Q.15 Define hand moulding machine.

Q.16 What is electrical control system.

Q.17 Explain any four moulding Defects.

Q.18 Explain shrinkage allowances.

Q.19 Explain Ejector Return mechanism.

Q.20 Differential between Runner and gates.
