

- Q.25 Explain any two Lathe accessories with diagram.
- Q.26 Write the safety precautions associated with Lathe.
- Q.27 Write short note on Radial drilling machines.
- Q.28 Explain Spot facing and counter boring in Drilling operations.
- Q.29 Explain the principle of Boring with neat diagram.
- Q.30 Explain the principle of a Shaper with neat diagram.
- Q.31 Explain horizontal broaching machines (pull type) with the help of neat sketch.
- Q.32 Differentiate between a Jig and a fixture.
- Q.33 Write various advantages of Jigs and Fixtures.
- Q.34 Differentiate between cutting fluid and lubricant.
- Q.35 Write the properties of cutting fluid? Give few examples of cutting Fluid.

SECTION-D

Note: Long answer type questions. Attempt any two questions out of three questions. (2x10=20)

- Q.36 Explain any five Lathe operations in details.
- Q.37 Explain various type of single point cutting tools used with Lathe Machines.
- Q.38 Explain Construction and working of Table type Boring machines.

No. of Printed Pages : 4
Roll No.

MSIL-121744/031744

4th Sem / Mech. Engg. (MSIL) Subject:- Workshop Technology - II

Time : 3Hrs.

M.M. : 100

SECTION-A

Note: Multiple choice questions. All questions are compulsory (10x1=10)

- Q.1 The main Constituent of high speed steel is
a) Tungsten b) Chromium
c) Vanadium d) Cobalt
- Q.2 The head stock in a lathe is situated
a) In front of operator
b) On left hand of operator
c) On right hand of operator
d) None of the above
- Q.3 The lead screw is used for
a) Knurling b) Thread cutting
c) Turning d) Drilling
- Q.4 Face plate is used for
a) Facing the Job b) Turning the Job
c) Threading the Job d) Holding the Job

- Q.5 Tapping operations is used for cutting
- a) Internal threads b) External threads
 - c) Multiple threads d) None of the above
- Q.6 The process of enlarging a hole is
- a) Drilling b) Boring
 - c) Reaming d) Turning
- Q.7 Which of the followings is the material of boring bits
- a) HSS b) Carbide
 - c) Ceramic d) All of the above
- Q.8 The table of shaper is made of
- a) Mild steel b) Cast steel
 - c) Cast Iron d) Steel
- Q.9 Jigs are used to work in
- a) Milling b) Turning
 - c) Threading d) Drilling
- Q.10 Which of the following is a solid lubricant?
- a) Graphite
 - b) Zinc oxide
 - c) Molybdenum disulphide
 - d) All of the above

SECTION-B

Note: Objective type questions. All questions are compulsory. (10x1=10)

- Q.11 Define cutting speed of a tool.
- Q.12 Define single point cutting tool.
- Q.13 Write the function of three Jaw chuck.
- Q.14 Define chamfering operation?
- Q.15 Write the function of mandrel.
- Q.16 Write any four drill materials.
- Q.17 Define Boring head.
- Q.18 Define Internal shaping.
- Q.19 Write any four materials used for Jigs and fixtures.
- Q.20 Define lubricant.

SECTION-C

Note: Short answer type questions. Attempt any twelve questions out of fifteen questions. (12x5=60)

- Q.21 Write various properties of cutting tool materials? Give few example of tool materials.
- Q.22 What are Back Rake Angle and Side Rake angle of a single point cutting tool?
- Q.23 Explain Principle of turning.
- Q.24 Explain Step turning and Knurling in Lathe operation.
